Remarks.

While running North between Sec. 8 & 9. and also between Sec. 7 & 8. a strange discrepancy occurred not easily to be accounted for. I had both closing lines remeasured under a belief that the defect was in my Chainmen; after testing the Case in this way, I am persuaded that some hidden power must have had an influence on the needle.

From a general knowledge of this Township I must say that it has many advantages. The Soil is mostly rich 2nd rate for farming. A large portion thereof, covered with heavy useful timber. Moreover the Creeks and Streams that pass through this good land. is sufficiently strong to move Mills &c with but little expence.

Meanders of Owl River. Down the Right Bank. Beginning at a Post on the Range line. Thence in Section 36.
